roshan.shakya1003@gmail.com

Kathmandu, Nepal

ABOUT ME

Full-stack web developer focused on building interactive and animated web experiences using GSAP and Framer Motion. Experienced in building real-time applications, authentication systems, and scalable full-stack architectures with modern tools. Focused on crafting high-performance, user-centric web products from concept to deployment.

PROJECTS

keyvoo.vercel.app

KEYVO | Typing Platform

- Developed a high-performance typing platform inspired by MonkeyType, featuring real-time multiplayer functionality using Ably for WebSockets.
- Engineered a friend recommendation algorithm that suggests users based on similar typing statistics and performance metrics.

bibekshakya.info.np

Animated Portfolio Site

- Developed a visually driven portfolio focused on high-end interactions and smooth transitions using GSAP and Framer

Kon | E-commerce Platform

- Developed a full-stack e-commerce solution for a brand
- Successfully integrated eSewa payment gateway for secure, real-time transactions.

<https://lms-sigma-eight-46.vercel.app/>

ThriveLMS | Learning Management System

- Built a comprehensive LMS featuring course management, student progress tracking.
- Focused on a clean, accessible UI/UX to ensure a smooth learning experience.
